"And we know that for those who love God all things work together for good, for those who are called according to his purpose."
Romans 8:28 (ESV) · this week's memory verse

DAY 1

Morning Work

Our school day has begun!

Nevaeh

Joseph · The Robe & the Dreams

"And we know that for those who love God all things work together for good, for those who are called according to his purpose."

Romans 8:28 (ESV) · memory verse

Verse song

Read: Genesis 37:1–11

Joseph was seventeen, and his father Jacob loved him more than his other sons. Jacob made him a robe of many colors, and his brothers hated him for it. Then Joseph had two dreams: his brothers' bundles of grain bowed down to his bundle, and the sun, moon, and eleven stars bowed down to him. When he told the dreams, his brothers hated him even more — and they were jealous. But his father kept the saying in mind. God was already at work in Joseph's story.

1. Why did Joseph's brothers hate him? Give two reasons from the passage.

2. What did the sun, moon, and eleven stars stand for in Joseph's second dream?

the twelve tribes' enemies | his father, mother, and eleven brothers | the kings of Egypt

Greek word of the day

ζῆλος (zēlos)

Means: jealousy; also zeal, strong feeling

James 3:16 — "where jealousy and selfish ambition exist, there will be disorder."

Theology fact

Sin often starts in the heart. The brothers' jealousy grew quietly until it led to something terrible — so we bring our feelings to God early.

Journal: Jealousy grew in the brothers until it took over. Is there anyone you're tempted to be jealous of? Write a prayer giving that to God.

DAY 1

Math Crash Course

Week 2 of 12 · Equivalent & Simplest Form

Nevaeh

Equivalent fractions name the same amount: multiply or divide the top and bottom by the **same** number. $\frac{2}{3} = \frac{8}{12}$ (× 4). **Simplest form:** divide top and bottom by the **GCF** (greatest common factor). $\frac{18}{24}$: GCF of 18 and 24 is 6 → $\frac{3}{4}$. **Improper → mixed:** divide. $\frac{17}{5}$ → 17 ÷ 5 = 3 R2 → $3\frac{2}{5}$. **Mixed → improper:** whole × bottom + top. $3\frac{2}{5}$ → 3 × 5 + 2 = 17 → $\frac{17}{5}$.

Watch

A. Write in simplest form.

1. $\frac{24}{30}$ = _____ **2.** $\frac{16}{56}$ = _____ **3.** $\frac{9}{15}$ = _____ **4.** $\frac{10}{15}$ = _____

5. $\frac{4}{16}$ = _____ **6.** $\frac{5}{25}$ = _____ **7.** $\frac{12}{16}$ = _____ **8.** $\frac{35}{40}$ = _____

B. Find the missing number.

9. $\frac{2}{3} = \frac{?}{9}$? = _____ **10.** $\frac{1}{9} = \frac{?}{27}$? = _____ **11.** $\frac{3}{5} = \frac{6}{?}$? = _____

C. Change improper fractions to mixed numbers (simplest form), and mixed numbers to improper fractions.

12. $\frac{26}{7}$ = _____ **13.** $\frac{62}{9}$ = _____ **14.** $\frac{25}{6}$ = _____ **15.** $\frac{33}{8}$ = _____

16. $1\frac{3}{5}$ = _____ **17.** $1\frac{2}{5}$ = _____ **18.** $1\frac{4}{9}$ = _____ **19.** $6\frac{1}{3}$ = _____

20. Which fraction is equivalent to 3/5?

6/8 5/3 9/15

21. What is the GCF of 18 and 30?

9 3 6

22. Which fraction is already in simplest form?

6/9 8/15 10/12

23. Which is the same as 4 1/2?

6/2 9/2 5/2

DAY 1

English

Week 3 · Punctuation Power · Commas

Nevaeh

Comma rules: ① **Series** of 3+ items: *eggs, milk, and bread.* ② After **introductory words/phrases**: *Yes, … Well, … However, … After lunch, …* ③ **Dates**: between day and year, and after the year mid-sentence: *On November 10, 2026, we started Week 3.* ④ **Places**: between city and state, and after the state mid-sentence: *Jacksonville, Florida, is our home.*

Watch

Mark each sentence C (correct) or N (needs a comma).

1. We packed sandwiches, apples, and water bottles. C N

2. Yes I finished my history page. C N

3. On July 4, 1776, Congress adopted the Declaration. C N

4. My cousin lives in Orlando Florida. C N

5. However, the rain stopped before lunch. C N

6. Bring your Bible a pencil and a notebook. C N

7. Which date is punctuated correctly?

- The fair opened on Friday March 6 2026 at noon.
- The fair opened on Friday, March 6, 2026, at noon.
- The fair opened on, Friday March 6, 2026 at noon.

8. Which sentence is correct?

- We drove to Savannah Georgia, for the weekend.
- We drove, to Savannah, Georgia for the weekend.
- We drove to Savannah, Georgia, for the weekend.

Rewrite each sentence with the missing commas.

9. Well I think we should leave at 8:00.

10. Nylah Naomi and Titus fed the chickens.

11. Grandma was born on May 12 1968 in Atlanta Georgia.

DAY 1

Science

Week 3 · Matter & Its Changes · States of Matter

Nevaeh

All matter is made of tiny particles (atoms and molecules) that are **always moving**. In a **solid**, particles are packed tightly and only **vibrate** in place, so a solid keeps its own shape and volume. In a **liquid**, particles are close but **slide past** each other, so a liquid has a set volume but takes the shape of its container. In a **gas**, particles are **far apart** and move fast in every direction, so a gas spreads out to fill any container. Adding thermal energy (heat) makes particles move faster — that's what causes **phase changes**: melting (solid → liquid), freezing (liquid → solid), evaporation/boiling (liquid → gas), condensation (gas → liquid), and sublimation (solid → gas, like dry ice). Water melts at 0 °C (32 °F) and boils at 100 °C (212 °F) at sea level.

Watch

State	Definite shape? (yes/no)	Definite volume? (yes/no)	How do the particles move?
Solid			
Liquid			
Gas			

Name the phase change.

1. An ice cube in your lemonade gets smaller.

freezing | condensation | melting

2. Drops of water form on the outside of a cold glass on a hot Florida day.

evaporation | melting | condensation

3. A puddle disappears after the sun comes out.

condensation | evaporation | sublimation

4. Dry ice turns straight into a foggy gas without melting.

freezing | evaporation | sublimation

5. Water in an ice-cube tray turns solid in the freezer.

freezing | condensation | melting

6. When you heat a liquid, its particles…

move faster and spread apart | slow down and pack together | stop moving

7. Use particles to explain why the smell of cookies baking spreads through the whole house.

DAY 1

History

Week 3 · The Road to Revolution · The French & Indian War

Nevaeh

Last week we met the Thirteen Colonies. By the 1750s, Britain and France both claimed the rich **Ohio River Valley**. In 1754, a 22-year-old Virginia officer named **George Washington** clashed with the French there and had to surrender at **Fort Necessity**. That started the **French and Indian War (1754–1763)** — Britain and its colonists against France and its Native American allies. Britain finally won, and in the **Treaty of Paris (1763)** France gave up Canada and its land east of the Mississippi River. Spain, France's ally, gave **Florida** to Britain! But the war nearly **doubled Britain's debt**. Parliament decided the colonists should help pay for it — and for the soldiers left to guard them. The **Proclamation of 1763** also forbade colonists to settle west of the **Appalachian Mountains**, which made many of them angry.

Watch

1. What land did Britain and France both want?

the Florida Keys | the Ohio River Valley | New England

2. Who fought on each side?

Britain vs. the colonists | France & the colonists vs. Spain | Britain & the colonists vs. France & its Native American allies

3. What happened to Florida in the Treaty of Paris (1763)?

Spain gave it to Britain. | It became the 14th colony to join the war. | France bought it.

4. Why was Britain short on money after the war, and how did it plan to fix that?

5. What did the Proclamation of 1763 forbid?

settling west of the Appalachian Mountains | trading with France | building new churches

6. Imagine you are a colonist who fought in the war. How would you feel about the Proclamation of 1763? Explain.

DAY 1

This week: the 3s and 4s. Read the 3s table out loud 3 times, then cover it and say it from memory. Chant it like a song: "3, 6, 9… 12, 15, 18… 21, 24, 27… 30!"

3 · 6 · 9 · 12 · 15 · 18 · 21 · 24 · 27 · 30

Watch the song

Write the 3s table. Say each fact out loud as you write it.

3 × 1 = _____ 3 × 2 = _____

3 × 3 = _____ 3 × 4 = _____

3 × 5 = _____ 3 × 6 = _____

3 × 7 = _____ 3 × 8 = _____

3 × 9 = _____ 3 × 10 = _____

Mixed 3s facts

1 × 3 = _____ 7 × 3 = _____ 1 × 3 = _____ 3 × 2 = _____ 3 × 3 = _____

3 × 1 = _____ 3 × 3 = _____ 3 × 8 = _____ 3 × 4 = _____ 2 × 3 = _____

7 × 3 = _____ 4 × 3 = _____ 3 × 6 = _____ 4 × 3 = _____ 9 × 3 = _____

3 × 1 = _____ 6 × 3 = _____ 3 × 3 = _____ 7 × 3 = _____ 3 × 9 = _____

DAY 1

Geography

Week 3 · Landforms

Nevaeh

A **landform** is a natural shape on Earth's surface. **Mountains** rise high with steep sides and a peak. **Hills** are lower and rounded. **Plains** are wide, flat land — great for farming. A **valley** is low land between hills or mountains, often with a river. A **plateau** is high land with a flat top and steep sides.

Watch first

1. _____

2. _____

3. _____

4. _____

5. _____

Label each picture.

hill · mountain · plain · plateau · valley

6. Which landform has a flat top and steep sides?

plateau · valley · hill

7. Where would a river most likely run?

on top of a plateau · on a mountain peak · through a valley

8. Why do many farms sit on plains?

Plains are always near volcanoes. · Plains are the coldest places. · The land is flat with good soil.

U.S. example	Which landform?
The Rocky Mountains	
The Great Plains	
The Colorado Plateau	
Death Valley	

9. How can a river make a valley over a long time? Explain.

DAY 1

Fun Electives

Kitchen Science Lab · Dancing Raisins

Nevaeh

Materials: 2 clear glasses, clear soda (lemon-lime or club soda), plain water, 6–8 raisins per glass.

Why it works: soda is full of dissolved **carbon dioxide** gas. A raisin is denser than the soda, so it sinks. But its wrinkly surface gives the gas lots of spots to form bubbles. When enough bubbles stick, they act like tiny life jackets — the raisin's overall density drops below the soda's and it rises (**buoyancy**). At the top the bubbles pop into the air, the raisin gets denser again, and down it goes. It keeps "dancing" until the soda goes flat.

Experiment video

Question: What will raisins do in soda compared with water?

Hypothesis: I think…

Observations: draw both glasses after 2 minutes.

1. What gas makes the bubbles in soda?

steam | carbon dioxide | oxygen

2. Why did the raisins in plain water stay on the bottom?

Raisins hate water. | There were no gas bubbles to lift them. | The water was too cold.

Test a variable: try a smooth food (a corn kernel or a piece of pasta) next to a raisin. Which danced more? Use the word *density* to explain.

DAY 2

Morning Work

Our school day has begun!

Nevaeh

Joseph · Sold by His Brothers

"And we know that for those who love God all things work together for good, for those who are called according to his purpose."

Romans 8:28 (ESV) · memory verse

Verse song

Read: Genesis 37:12–36

Jacob sent Joseph to check on his brothers, who were far away with the sheep. When they saw him coming, they plotted to kill him. Reuben talked them into throwing him into an empty pit instead, hoping to rescue him later. Then Judah said, "Let's sell him," and they sold Joseph to traders for twenty pieces of silver. They dipped his robe in goat's blood, and Jacob believed a wild animal had killed his son. Joseph was taken to Egypt as a slave — but he was not forgotten by God.

1. Which brother tried to save Joseph, and which brother suggested selling him?

- Benjamin tried to save him; Levi suggested selling him
- Judah tried to save him; Reuben suggested selling him
- Reuben tried to save him; Judah suggested selling him

2. How could Joseph have hope in Egypt even though everything went wrong? Explain.

Greek word of the day

ἐλπίς (elpis)

Means: hope — a sure expectation of good from God

Romans 5:5 — "hope does not put us to shame."

Theology fact

Nothing that happens to God's children is outside His care. Joseph's worst day was still part of God's good plan.

Journal: Joseph's family turned against him. Write about how Romans 8:28 could help someone on their worst day.

DAY 2

Math Crash Course

Week 2 of 12 · Adding & Subtracting Fractions

Nevaeh

You can only add or subtract fractions with the **same denominator**. Find the **LCD** (least common denominator), rename each fraction, then add or subtract the numerators. Keep the denominator. Simplify. $\frac{1}{4} + \frac{2}{3}$: LCD = 12 → $\frac{3}{12} + \frac{8}{12} = \frac{11}{12}$.

Mixed numbers: do the fractions, then the whole numbers. If you can't subtract the fractions, **borrow** 1 whole: $6\frac{1}{6} - 2\frac{3}{4} \rightarrow 6\frac{2}{12} - 2\frac{9}{12} \rightarrow 5\frac{14}{12} - 2\frac{9}{12} = \mathbf{3\frac{5}{12}}$.

Watch

Show your work. Answers in simplest form (change improper answers to mixed numbers).

1. $\frac{4}{5} + \frac{9}{10} =$

2. $\frac{1}{4} + \frac{1}{5} =$

3. $\frac{5}{6} + \frac{5}{8} =$

4. $\frac{2}{3} + \frac{1}{4} =$

5. $\frac{2}{3} - \frac{1}{8} =$

6. $\frac{5}{6} - \frac{3}{4} =$

7. $\frac{5}{6} - \frac{4}{5} =$

8. $\frac{5}{6} - \frac{7}{9} =$

9. $5\frac{1}{2} + 3\frac{4}{7} =$

10. $5\frac{1}{2} + 1\frac{1}{3} =$

11. $6\frac{2}{3} - 1\frac{4}{5} =$

12. $7\frac{3}{8} - 3\frac{11}{12} =$

13. What is the LCD of 6 and 8?

24 | 14 | 48

14. 1/2 + 1/3 = ?

5/6 | 2/5 | 2/6

15. To subtract 3 1/5 - 1 3/5, you first need to...

subtract 3/5 - 1/5 | borrow 1 from the 3 (3 1/5 = 2 6/5) | add the wholes

16. A recipe needs 2 3/4 cups of flour. You have 1 1/3 cups. How much more do you need?

DAY 2

English

Week 3 · Punctuation Power · Semicolons & Colons

Nevaeh

A **semicolon (;)** joins two **complete sentences** that are closely related, without a FANBOYS word: *The power went out; we lit candles.* With words like **however** or **therefore**, use a semicolon before and a comma after: *It rained; however, we still played.*
A **colon (:)** comes after a complete sentence to introduce a **list** or an **explanation**: *Bring three things: a pencil, a ruler, and an eraser.* Colons also go in **times** (8:30) and **Bible references** (John 3:16). Don't put a colon right after *are* or *include*.

Watch

Which mark belongs in the blank? Circle ; or :

1. I have one goal ___ finish the race. ; :

2. The bus was late ___ we missed the first song. ; :

3. We need three things ___ eggs, milk, and flour. ; :

4. Titus loves trucks ___ Nayeli loves dolls. ; :

5. Church starts at 10 ___ 30 on Sunday. ; :

6. It was cold ___ however, we still went swimming. ; :

7. Read Psalm 23 ___ 1 before bed. ; :

8. The puppy was tired ___ it fell asleep on the rug. ; :

9. Which uses a colon correctly?

- My: favorite fruits are mango, kiwi, and pears.
- My favorite fruits are: mango, kiwi, and pears.
- My favorite fruits are these: mango, kiwi, and pears.

10. Which uses a semicolon correctly?

- The power went out; we lit candles.
- The power; went out we lit candles.
- The power went out; and we lit candles.

11. Join with a semicolon and **however**: *I studied hard. The test was still tricky.*

12. Write a sentence that uses a colon to introduce a list of your favorite foods.

13. Write a sentence where a semicolon joins two related ideas about your week.

DAY 2

Science

Week 3 · Matter & Its Changes · Physical vs. Chemical Changes

Nevaeh

A **physical property** can be observed without changing what the substance is: color, hardness, density, melting point, whether it's magnetic, whether it dissolves. A **chemical property** describes how a substance can change into a **new** substance: flammability (can it burn?), ability to rust, reacting with acid.
A **physical change** changes size, shape, or state, but it is still the same stuff (cutting, melting, dissolving). A **chemical change** makes a **new substance** with new properties (burning, rusting, cooking, digesting). Physical changes are often easy to undo; chemical changes usually are not.

Watch

Mark each P (physical change) or C (chemical change).

1. Chopping firewood (P) (C)

2. Burning firewood (P) (C)

3. An iron gate rusting (P) (C)

4. Ice melting (P) (C)

5. Baking a cake (P) (C)

6. Dissolving sugar in tea (P) (C)

7. Milk going sour (P) (C)

8. Tearing paper (P) (C)

9. A banana turning brown (P) (C)

10. Boiling water (P) (C)

11. Which is a **chemical property** of wood?

It floats on water. | It can burn. | It is brown.

12. Which is a **physical property** of copper?

It turns green when it reacts with air over time. | It is shiny and orange-brown. | It reacts with nitric acid.

13. Dissolving salt in water is a physical change because…

a new substance forms | the salt is still salt — you can get it back by evaporating the water | it gives off light

14. A marshmallow over a campfire turns black and crispy. Physical or chemical? How do you know?

15. Name one physical change and one chemical change that happen in your kitchen.

DAY 2

History

Week 3 · The Road to Revolution · The Stamp Act, 1765

Nevaeh

To pay its war debt, Parliament passed the **Sugar Act (1764)** and then the **Stamp Act (1765)**, the first tax placed **directly** on the colonists. Newspapers, legal documents, licenses, pamphlets, and even playing cards had to carry a paid tax stamp. Colonists were furious — not mostly about the money, but because they had **no representatives in Parliament**. Their cry: **"No taxation without representation!"** Groups called the **Sons of Liberty** protested, sometimes violently. Nine colonies sent delegates to the **Stamp Act Congress**, and merchants **boycotted** (refused to buy) British goods. Parliament **repealed** the Stamp Act in 1766 — but passed the **Declaratory Act**, saying it could make laws for the colonies "in all cases whatsoever." In 1767 the **Townshend Acts** taxed glass, lead, paint, paper, and tea.

Watch

1. What did the Stamp Act tax?

- only sugar and molasses
- printed paper like newspapers, legal documents, and playing cards
- land and houses

2. What did "no taxation without representation" mean?

- Only a government where colonists had elected representatives should tax them.
- Colonists should never pay any taxes.
- Only the king could set taxes.

3. What is a boycott?

- refusing to buy goods to protest
- a law passed by Parliament
- a ship that carries tea

4. Why did Parliament repeal the Stamp Act, and why didn't that end the conflict?

5. Which items did the Townshend Acts tax?

- guns and gunpowder
- glass, lead, paint, paper, and tea
- sugar and coffee

6. Romans 13:7 (ESV) says, "Pay to all what is owed to them: taxes to whom taxes are owed." The colonists didn't refuse all taxes; they objected to taxes passed without their consent. Do you think peaceful protest like a boycott was a fair response? Explain.

DAY 2

Multiplication Mastery

Week 3 · The 4s

Nevaeh

The 4s: every answer is an even number. Read the table out loud 3 times, then cover it and say it from memory. Watch the tricky ones: 4 × 6 = 24, 4 × 7 = 28, 4 × 8 = 32.

4 · 8 · 12 · 16 · 20 · 24 · 28 · 32 · 36 · 40

Watch the song

Write the 4s table. Say each fact out loud as you write it.

4 × 1 = _____ 4 × 2 = _____

4 × 3 = _____ 4 × 4 = _____

4 × 5 = _____ 4 × 6 = _____

4 × 7 = _____ 4 × 8 = _____

4 × 9 = _____ 4 × 10 = _____

Mixed 4s facts

4 × 2 = _____	3 × 4 = _____	4 × 4 = _____	1 × 4 = _____	9 × 4 = _____
4 × 1 = _____	8 × 4 = _____	4 × 1 = _____	4 × 3 = _____	4 × 8 = _____
4 × 4 = _____	6 × 4 = _____	9 × 4 = _____	3 × 4 = _____	7 × 4 = _____
4 × 1 = _____	4 × 4 = _____	4 × 5 = _____	8 × 4 = _____	4 × 5 = _____

DAY 2

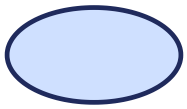

Geography

Week 3 · Bodies of Water

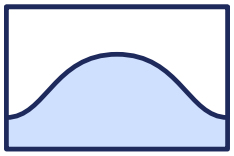

Nevaeh

A **body of water** is any large area of water. **Oceans** are the largest and are salt water. A **river** is fresh water flowing in a channel from a **source** to its **mouth**, where it empties into a bigger body of water. A **lake** is water surrounded by land (most are fresh). A **bay** is part of an ocean or lake that curves into the land; a **gulf** is like a bay, but usually larger.

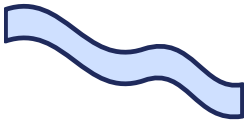

Watch first

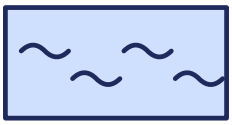

1. _____

2. _____

3. _____

4. _____

Label each picture.

bay | lake | ocean | river

Fresh water (F) or salt water (S)?

5. Atlantic Ocean F S

6. Lake Okeechobee F S

7. Pacific Ocean F S

8. Mississippi River F S

9. Tampa Bay F S

10. Lake Michigan F S

11. Where a river empties into the ocean is called its…

source | mouth | peak

12. The Great Salt Lake in Utah is salty even though it's a lake. Rivers flow in, but no river flows out. Explain why that could make it salty.

DAY 2

Fun Electives

Artist Study · Claude Monet · Water Lilies

Nevaeh

Claude Monet (1840–1926) was a French painter and a leader of **Impressionism** — painting quick, loose brushstrokes to capture light and color in a moment instead of every tiny detail. His painting *Impression, Sunrise* (1872) gave the movement its name. At his home in Giverny he dug a pond, built a Japanese-style bridge, and planted **water lilies** — then painted them about 250 times, in morning light, afternoon light, and evening light!

Draw-along

Monet's story

1. What does an Impressionist painter try to capture?

only people's faces | every tiny detail, like a photo | light and color in a moment

2. Why did Monet paint the same pond again and again?

Draw-along: your own water-lily pond. Water first (blues and purples, side-to-side strokes), then lily pads, then flowers. Smudge or blend for soft light. Add the bridge if you like.

Title your piece. What time of day is your light, and how did you show it with color?

DAY 3

Morning Work

Our school day has begun!

Nevaeh

Joseph · Faithful in Egypt

"And we know that for those who love God all things work together for good, for those who are called according to his purpose."

Romans 8:28 (ESV) · memory verse

Verse song

Read: Genesis 39

Joseph was bought by Potiphar, an officer of Pharaoh. "The LORD was with Joseph," and everything he did went well, so Potiphar put him in charge of his whole house. When Potiphar's wife tried again and again to get him to sin, Joseph refused: "How then can I do this great wickedness and sin against God?" She lied about him, and Joseph was thrown into prison for doing right. But even in prison the LORD was with him, and the keeper of the prison put Joseph in charge.

1. What did Joseph say when he was tempted to sin? (39:9)

- "How then can I do this great wickedness and sin against God?"
- "I will ask Potiphar first."
- "No one will ever find out."

2. Joseph did right and still ended up in prison. What does that teach about obeying God?

Greek word of the day

πειρασμός (peirasmos)

Means: temptation, testing

1 Corinthians 10:13 — "God is faithful, and he will not let you be tempted beyond your ability."

Theology fact

Joseph saw sin as sin against God first. Faithfulness means pleasing God whether we are rewarded or not.

Journal: Joseph stayed faithful when it cost him. Where is it hardest for you to do right when no one is watching? What will you do?

DAY 3

Multiply the numerators, **multiply** the denominators, then simplify. No common denominator needed! $\frac{2}{3} \times \frac{9}{10} = \frac{18}{30} = \mathbf{\frac{3}{5}}$. You may also simplify (cancel) a top and a bottom number by a common factor **before** you multiply. **Whole numbers:** write over 1 — $4 \times \frac{2}{3} = \frac{4}{1} \times \frac{2}{3} = \frac{8}{3} = 2\frac{2}{3}$. **Mixed numbers:** change to improper fractions first — $1\frac{1}{2} \times 2\frac{2}{3} = \frac{3}{2} \times \frac{8}{3} = \frac{24}{6} = \mathbf{4}$.

Watch

Show your work. Answers in simplest form.

1. $\frac{3}{4} \times \frac{1}{6} =$

2. $\frac{3}{5} \times \frac{8}{9} =$

3. $\frac{4}{5} \times \frac{1}{4} =$

4. $\frac{1}{5} \times \frac{6}{7} =$

5. $\frac{4}{9} \times \frac{3}{4} =$

6. $5 \times \frac{5}{6} =$

7. $12 \times \frac{5}{6} =$

8. $3\frac{1}{3} \times 2\frac{1}{2} =$

9. $3\frac{1}{4} \times 2\frac{1}{3} =$

10. $3\frac{2}{3} \times \frac{5}{6} =$

11. 3/4 × 2/5 = ?

6/9 | 5/9 | 3/10

12. Before you multiply 2 1/3 × 3/4, you should…

multiply 2 × 3 only | find a common denominator | change 2 1/3 to 7/3

13. When you multiply two fractions less than 1, the answer is…

always 1 | bigger than both | smaller than both

14. Our co-op has 24 kids, and 3/4 of them came on the field trip. How many came?

15. A board is 5 1/2 feet long. Dad uses 2/3 of it. How many feet does he use?

DAY 3

English

Week 3 · Punctuation Power · Quotation Marks & Dialogue

Nevaeh

Quotation marks go around a speaker's **exact words**. Capitalize the first word of the quote. Commas, periods, question marks, and exclamation points go **inside** the closing marks.
Mom said, "Wash your hands." · "Wash your hands," Mom said. · "Did you finish?" asked Dad.
A **split quote**: *"When you finish," Mom said, "bring me your page."* In a story, start a **new paragraph** every time the speaker changes. Titles of **short works** (songs, poems, chapters) also go in quotation marks: "Amazing Grace."

Watch

1. Which is punctuated correctly?

- "Let's go to the park", said Naomi.
- "Let's go to the park," Said Naomi.
- "Let's go to the park," said Naomi.

2. Which is punctuated correctly?

- Dad asked, "Who left the gate open"?
- Dad asked "who left the gate open?"
- Dad asked, "Who left the gate open?"

3. Which split quote is correct?

- "If it rains," Titus said, "we'll play inside."
- "If it rains," Titus said, "We'll play inside."
- "If it rains" Titus said "we'll play inside."

4. Which sentence uses quotation marks for a title correctly?

- "We sang Amazing Grace at church."
- We sang "Amazing Grace" at church.
- We sang Amazing "Grace" at church.

Rewrite with correct quotation marks, commas, and capitals.

5. pastor james said remember to bring your Bible

6. can I help with dinner asked Nevaeh

7. Write a short dialogue (4 lines) between you and a friend planning a fun day. New speaker = new line.

DAY 3

Science

Week 3 · Matter & Its Changes · Chemical Reactions

Nevaeh

In a **chemical reaction**, atoms rearrange to make new substances. The starting substances are the **reactants**; the new ones are the **products**. A chemical equation shows them with an arrow that means "yields": **reactants → products**. Rust: $4Fe + 3O_2 \rightarrow 2Fe_2O_3$ (iron + oxygen → iron oxide).
Signs a reaction happened: ① gas bubbles (not from boiling), ② color change, ③ temperature change or light given off, ④ a **precipitate** (a solid forms when two liquids mix), ⑤ a new odor. Baking soda + vinegar fizzes because it makes carbon dioxide gas.

Watch

For each equation, list the reactants and the products.

1. $4Fe + 3O_2 \rightarrow 2Fe_2O_3$

Reactants: _____ Products: _____

2. $CH_4 + 2O_2 \rightarrow CO_2 + 2H_2O$

Reactants: _____ Products: _____

3. $NaHCO_3 + HCl \rightarrow NaCl + H_2O + CO_2$

Reactants: _____ Products: _____

4. Which is a sign of a chemical reaction?

- Bubbles form when you drop an antacid tablet in water.
- Butter melts in a pan.
- Water boils into steam.

5. Which is NOT a sign of a chemical reaction?

- A sparkler giving off light and heat
- A cloudy solid forming when two clear liquids mix
- Ice cubes melting in a cup

6. A solid that forms when two liquids are mixed is called a…

- reactant
- precipitate
- solution

7. In an equation, the arrow means…

- equals exactly
- subtract
- yields (makes)

8. Glow sticks give off light when you snap them. Which sign of a reaction is that?

- light given off
- gas bubbles
- a precipitate

9. Bread dough rises and bakes into a loaf. List two signs that chemical changes happened.

DAY 3

History

Week 3 · The Road to Revolution · Boston Massacre & Tea Party

Nevaeh

Britain sent soldiers to keep order in Boston, and tension grew. On **March 5, 1770**, a crowd taunted and threw snowballs at British soldiers, who fired into it and killed **five colonists**, including **Crispus Attucks**, a man of African and Native American descent. Patriots called it the **Boston Massacre**, and Paul Revere's famous engraving spread anger through the colonies. Yet lawyer **John Adams** defended the soldiers in court because he believed everyone deserved a fair trial; most were found not guilty. Parliament dropped the Townshend taxes — except the tax on **tea**. After the **Tea Act (1773)**, on **December 16, 1773**, Sons of Liberty disguised as Mohawk Indians boarded three ships and dumped **342 chests** of tea into Boston Harbor: the **Boston Tea Party**.

Watch

1. When was the Boston Massacre, and how many colonists were killed?

- December 16, 1773 — none
- July 4, 1776 — fifty
- March 5, 1770 — five

2. Who was Crispus Attucks?

- one of the five colonists killed in the Boston Massacre
- the British captain who gave the order
- the lawyer who defended the soldiers

3. Why did Paul Revere's engraving matter?

- It was used as evidence to free the soldiers.
- It was a map of Boston Harbor.
- It spread anger by showing the event as a cruel attack.

4. Exodus 23:2 (ESV) says, "You shall not fall in with the many to do evil… siding with a majority, so as to pervert justice." How did John Adams live this out?

5. What happened at the Boston Tea Party?

- British troops burned the colonists' tea.
- Colonists threw a party to welcome British soldiers.
- Colonists dumped 342 chests of British tea into Boston Harbor.

6. Was the Boston Tea Party right or wrong? Give one reason for each side, then your opinion.

DAY 3

Multiplication Mastery

Week 3 · 3s & 4s Mix-Up

Nevaeh

Mix-up day! Say the 3s and 4s tables out loud once each. Then do all 30 facts — they include the 0s, 1s, 2s, 5s, and 10s you already know. Circle any you had to stop and think about, and practice those 3 extra times.

Watch the song

Mixed facts

4 × 5 = ____	3 × 10 = ____	6 × 4 = ____	2 × 9 = ____	3 × 4 = ____
5 × 9 = ____	0 × 2 = ____	8 × 2 = ____	4 × 7 = ____	2 × 10 = ____
3 × 1 = ____	2 × 4 = ____	5 × 8 = ____	7 × 10 = ____	4 × 6 = ____
5 × 2 = ____	2 × 4 = ____	8 × 3 = ____	4 × 7 = ____	3 × 9 = ____
4 × 6 = ____	4 × 2 = ____	1 × 0 = ____	2 × 8 = ____	2 × 5 = ____
3 × 4 = ____	5 × 3 = ____	10 × 1 = ____	5 × 2 = ____	9 × 3 = ____

Facts I circled (write each one 3 times):

DAY 3

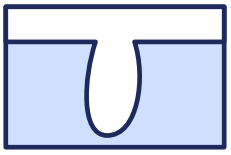

Geography

Week 3 · Islands, Peninsulas & Isthmuses

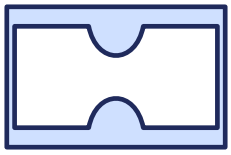

Nevaeh

An **island** is land surrounded by water on all sides; a group of islands is an **archipelago** (like Hawaii). A **peninsula** is land surrounded by water on three sides — Florida is one of the most famous peninsulas in the world! An **isthmus** is a narrow strip of land that connects two larger land areas, with water on both sides (the Isthmus of Panama joins North and South America).

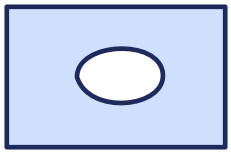

Watch first

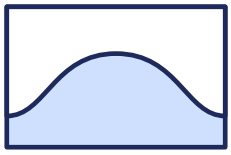

1. _____

2. _____

3. _____

4. _____

Label each picture.

bay | island | isthmus | peninsula

5. Hawaii is a chain of islands. What is that called?

an isthmus | a plateau | an archipelago

6. Which country is a boot-shaped peninsula in Europe?

Japan | Egypt | Italy

7. Which connects North and South America?

the Andes | the Nile River | the Isthmus of Panama

8. Florida touches water on three sides. Name two of those bodies of water.

9. Being a peninsula affects life in Florida. Give two ways (think beaches, weather, ships, fishing).

DAY 3

Fun Electives

Musician Study · J. S. Bach · Soli Deo Gloria

Nevaeh

Johann Sebastian Bach (1685–1750) was a German composer of the **Baroque** era and one of the greatest musicians who ever lived. For his last 27 years he led the music at St. Thomas Church in Leipzig, writing new music for worship almost every week. Bach often wrote **"S.D.G."** at the end of his music — *Soli Deo Gloria*, "To God alone be the glory." His "Jesu, Joy of Man's Desiring" comes from a church cantata (1723). Bach and his two wives had 20 children, and several of his sons became famous composers too.

Listen here

Bach's story

Listen to	Fast or slow?	Loud or soft?	Instruments I hear / how it makes me feel
Jesu, Joy of Man's Desiring			
Air (from Orchestral Suite No. 3)			
Brandenburg Concerto No. 3, 1st movement			

1. What does "Soli Deo Gloria" mean?

The end of the song | Music is my life | To God alone be the glory

2. Bach lived during which era of music?

Modern | Baroque | Romantic

Bach did his work for God's glory. What would it look like to do your schoolwork "for God's glory" (1 Corinthians 10:31)?

DAY 4

Morning Work

Our school day has begun!

Nevaeh

Joseph · Pharaoh's Dreams

"And we know that for those who love God all things work together for good, for those who are called according to his purpose."

Romans 8:28 (ESV) · memory verse

Verse song

Read: Genesis 41

Pharaoh had two dreams no one could explain: seven fat cows eaten by seven thin cows, and seven full ears of grain swallowed by seven thin ones. Joseph was brought from prison and said, "It is not in me; God will give Pharaoh a favorable answer." God showed him the meaning: seven years of plenty, then seven years of famine. Joseph told Pharaoh to store up grain in the good years. Pharaoh put Joseph — now thirty years old — in charge of all Egypt.

1. What did the seven fat cows and seven thin cows stand for?

- seven years of plenty, then seven years of famine
- seven wars Egypt would win
- seven good kings, then seven bad kings

2. Joseph said, "It is not in me." Why is that answer important? What does it show about him?

Greek word of the day

σοφία (sophia)

Means: wisdom

James 1:5 — "If any of you lacks wisdom, let him ask God, who gives generously to all."

Theology fact

Every good gift comes from God. Joseph gave God the credit, and God used Joseph's wisdom to save many lives.

Journal: Joseph pointed Pharaoh to God instead of himself. What gift or talent has God given you? How can you use it to point people to Him?

DAY 4

The **reciprocal** of a fraction is the fraction flipped: $\frac{3}{4} \leftrightarrow \frac{4}{3}$. To **divide** fractions, keep the first fraction, change ÷ to ×, and multiply by the **reciprocal** of the second fraction. $\frac{2}{3} \div \frac{4}{5} = \frac{2}{3} \times \frac{5}{4} = \frac{10}{12} = \mathbf{\frac{5}{6}}$. Change mixed numbers and whole numbers to improper fractions **first**: $2\frac{1}{4} \div 2 = \frac{9}{4} \div \frac{2}{1} = \frac{9}{4} \times \frac{1}{2} = \mathbf{1\frac{1}{8}}$. Check: the answer × the divisor should give you back the first number.

Watch

Show your work. Answers in simplest form.

1. $\frac{3}{4} \div \frac{1}{2} =$

2. $\frac{1}{3} \div \frac{2}{5} =$

3. $\frac{1}{3} \div \frac{1}{4} =$

4. $\frac{7}{9} \div \frac{1}{2} =$

5. $\frac{1}{5} \div \frac{1}{2} =$

6. $6 \div \frac{2}{3} =$

7. $4\frac{1}{6} \div 1\frac{1}{4} =$

8. $3\frac{1}{2} \div 1\frac{1}{3} =$

9. $5\frac{2}{3} \div 2 =$

10. What is the reciprocal of 2 1/2?

5/2 | 1/2 | 2/5

11. What is the reciprocal of 7?

7/7 | 1/7 | 7

12. To divide 3/8 ÷ 1/4 you…

multiply 8/3 × 1/4 | multiply 3/8 × 4/1 | find a common denominator and subtract

13. You have 3 3/4 yards of ribbon. Each bow takes 5/8 yard. How many bows can you make?

14. Mom splits a 2/3-pound bag of trail mix evenly into 4 snack bags. How much is in each bag?

DAY 4

English

Week 3 · Punctuation Power · Apostrophes

Nevaeh

Apostrophes do two jobs.
① **Contractions** — the apostrophe replaces missing letters: *do not → don't, it is → it's, they are → they're, will not → won't.*
② **Possessives** (ownership): one owner → add **'s** (*the dog's bowl*). Plural ending in s → add just **'** (*the dogs' bowls*). Plural not ending in s → add **'s** (*the children's books*).
Never use an apostrophe for possessive pronouns (*its, yours, hers, theirs, whose*) or for plain plurals (*two apples*, not *apple's*).

Watch

Circle the correct word.

1. The cat licked (its / it's) paw.

2. (They're / Their / There) coming over after lunch.

3. I can't find (Dad's / Dads') keys.

4. Both (girls' / girl's) jackets were on the floor.

5. (It's / Its) going to be a sunny day.

6. The (children's / childrens') choir sang first.

7. (Whose / Who's) shoes are these?

8. We bought three (apples / apple's) at the market.

Write the contraction.

9. can not → _____

10. I would → _____

11. we have → _____

12. should not → _____

Write it as a possessive (example: the bowl of the dog → the dog's bowl).

13. the nest of the bird _____

14. the bikes belonging to my brothers _____

15. the toys of the children _____

16. Which sentence is correct?

The Smith's van is in the driveway. | The Smiths van' is in the driveway. | The Smiths' van is in the driveway.

17. Write one sentence that uses BOTH *its* and *it's* correctly.

_____

DAY 4

Science

Week 3 · Matter & Its Changes · Conservation of Mass

Nevaeh

The **law of conservation of mass**: in a chemical reaction, matter is not created or destroyed — atoms are only **rearranged**. So the total mass of the reactants equals the total mass of the products (in a closed container). French chemist **Antoine Lavoisier** showed this in the late 1700s.
Counting atoms: a **subscript** (small number) counts the atoms of the element just before it: H_2O has 2 H and 1 O. A **coefficient** (big number in front) multiplies the whole molecule: $3H_2O$ has 6 H and 3 O. An equation is **balanced** when every element has the same number of atoms on both sides.

Watch

Count the atoms on each side. Is it balanced?

Equation	Reactant side (left)	Product side (right)	Balanced?
1. $2H_2 + O_2 \rightarrow 2H_2O$	H: ___ O: ___	H: ___ O: ___	
2. $CH_4 + 2O_2 \rightarrow CO_2 + 2H_2O$	C: ___ H: ___ O: ___	C: ___ H: ___ O: ___	
3. $2Mg + O_2 \rightarrow 2MgO$	Mg: ___ O: ___	Mg: ___ O: ___	
4. $N_2 + 3H_2 \rightarrow 2NH_3$	N: ___ H: ___	N: ___ H: ___	

5. How many atoms of each element are in $2C_6H_{12}O_6$ (two sugar molecules)?

6. Is $H_2 + O_2 \rightarrow H_2O$ balanced?

- Yes — there are 3 molecules
- Yes — it has H and O on both sides
- No — 2 oxygen atoms on the left but only 1 on the right

7. In a sealed bag, 10 g of baking soda reacts with 50 g of vinegar. What is the mass of everything in the bag afterward?

- less than 60 g, because gas formed
- 50 g
- 60 g

8. If you do the same reaction in an open cup, the cup weighs less afterward. Why?

- Carbon dioxide gas escaped into the air.
- Atoms were destroyed.
- The vinegar evaporated instantly.

9. Explain in your own words why the number of atoms must be the same on both sides of an equation.

DAY 4

History

Week 3 · The Road to Revolution · 1774–1775: War Begins

Nevaeh

Parliament punished Boston with the **Coercive Acts (1774)** — colonists called them the **Intolerable Acts**. They **closed Boston Harbor** until the tea was paid for, cut back Massachusetts' self-government, and let troops be housed in colonists' buildings. Other colonies sent Boston help. In **September 1774**, delegates from 12 colonies (all but Georgia) met in Philadelphia as the **First Continental Congress**. They agreed to boycott British goods and petition King George III. On the night of **April 18, 1775**, **Paul Revere** and **William Dawes** rode to warn that British troops were marching to seize weapons at Concord. On **April 19, 1775**, militia ("minutemen") faced the British at **Lexington** and **Concord** — the first battles of the American Revolution, the "shot heard round the world."

Watch

1. What did the Intolerable Acts do to Boston?

- lowered the tax on tea
- made Boston the capital of the colonies
- closed Boston Harbor until the tea was paid for

2. Which colony did NOT send delegates to the First Continental Congress?

- Virginia
- Massachusetts
- Georgia

3. Name two things the First Continental Congress decided to do.

---

4. Why were the British marching to Concord?

- to collect the Stamp Act tax
- to sign a peace treaty
- to seize the colonists' weapons and gunpowder

5. What happened on April 19, 1775?

- The Boston Tea Party took place.
- The battles of Lexington and Concord began the Revolution.
- The Declaration of Independence was signed.

6. Why do you think colonies that weren't punished still helped Boston?

Number these events in order (1–4).

7. Lexington and Concord (1) (2) (3) (4)

8. Intolerable Acts (1) (2) (3) (4)

9. Boston Tea Party (1) (2) (3) (4)

10. First Continental Congress (1) (2) (3) (4)

DAY 4

Multiplication Mastery

Week 3 · Word Problems + Speed Drill

Nevaeh

"Each" and "every" are clue words to multiply. Write the multiplication fact, then the answer.

Watch the song

1. A tricycle has 3 wheels. How many wheels are on 7 tricycles?

Fact: _____ Answer: _____

2. Each chair has 4 legs. How many legs do 6 chairs have?

Fact: _____ Answer: _____

3. Mom packed 3 crackers for every kid. There are 8 kids. How many crackers?

Fact: _____ Answer: _____

4. A pack holds 4 juice boxes. How many juice boxes are in 9 packs?

Fact: _____ Answer: _____

5. Nylah read 3 chapters every day for 5 days. How many chapters did she read?

Fact: _____ Answer: _____

6. There are 4 quarters in a dollar. How many quarters are in 7 dollars?

Fact: _____ Answer: _____

Speed drill — Mom times 2 minutes. Time: _____

7 × 4 = ____	3 × 1 = ____	4 × 2 = ____	3 × 3 = ____	10 × 3 = ____
4 × 9 = ____	5 × 3 = ____	4 × 2 = ____	3 × 5 = ____	3 × 3 = ____
2 × 4 = ____	4 × 8 = ____	3 × 2 = ____	3 × 6 = ____	10 × 3 = ____
1 × 4 = ____	4 × 5 = ____	10 × 4 = ____	4 × 3 = ____	8 × 3 = ____

DAY 4

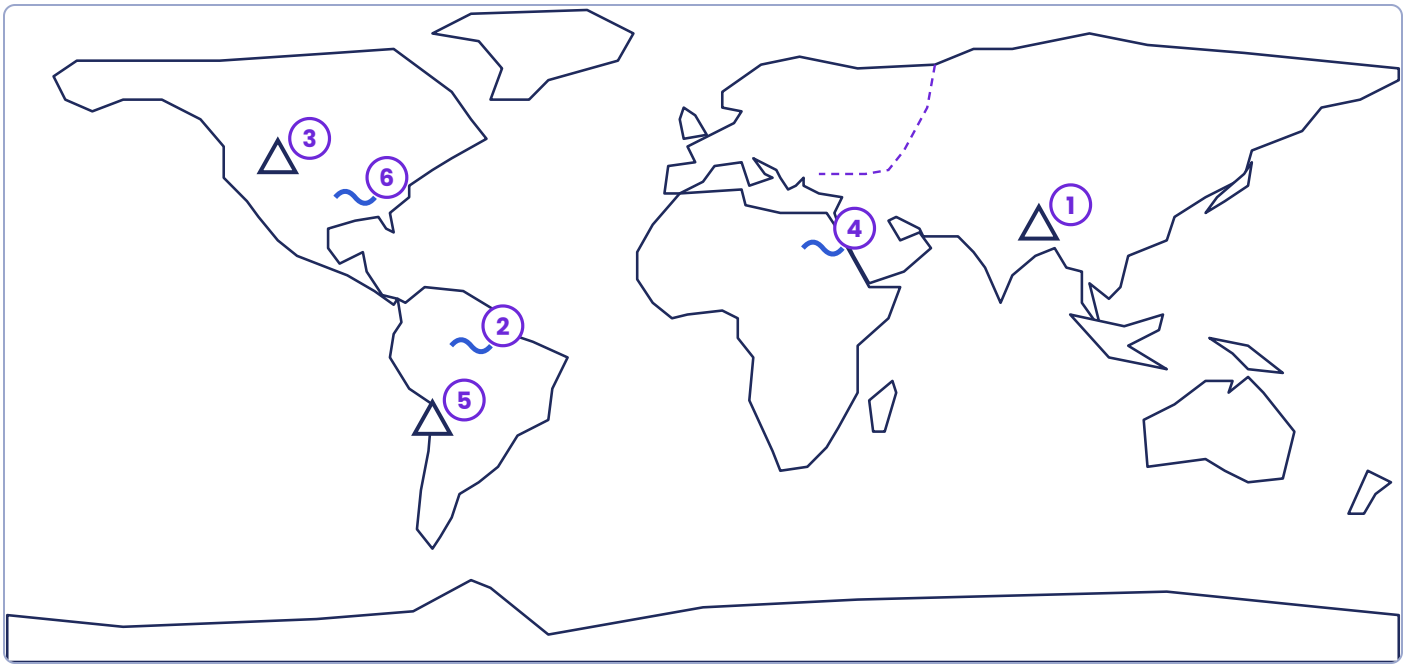

Geography

Week 3 · Great Rivers & Mountains

Nevaeh

Mount Everest in the Himalayas (Asia) is the highest mountain above sea level — about 29,032 feet (8,849 m). The **Nile** (Africa, about 4,130 miles) is usually called the longest river, and the **Amazon** (South America) carries the most water. The **Andes** are the longest mountain range on land. In North America, the **Mississippi River** flows south to the Gulf, and the **Rocky Mountains** run through the West.

Watch first

Match each place to its number on the map. (▲ = mountains, ∿ = river)

1. Nile River — 1 2 3 4 5 6

2. Amazon River — 1 2 3 4 5 6

3. Mississippi River — 1 2 3 4 5 6

4. Himalayas — 1 2 3 4 5 6

5. Andes Mountains — 1 2 3 4 5 6

6. Rocky Mountains — 1 2 3 4 5 6

7. Which continent are the Himalayas on?

Africa | Asia | Europe

8. Why do you think so many big cities are built on rivers? Give two reasons.

DAY 4

Fun Electives

Life Skills Club · Emergency Ready: 9-1-1

Nevaeh

9-1-1 is for emergencies only: a fire, someone badly hurt or not breathing, a crime or danger happening right now. On the call: stay calm, say **what** is happening and **where** (your address), answer the dispatcher's questions, and **don't hang up** until they tell you to. If there's a fire: get out, stay out, and go to the family meeting spot.

Some areas also let you text 9-1-1 if it isn't safe to talk — but calling is always best when you can.

911 video

When to call

Emergency (E) or not an emergency (N)?

1. Smoke is coming from the kitchen. E N

2. The internet is down. E N

3. A sibling is choking and can't breathe. E N

4. A stranger is trying to break in. E N

5. I can't find my shoes. E N

6. Someone fell and is bleeding a lot. E N

7. What should you do before you hang up?

Wait until the dispatcher says it's OK. | Call a friend first. | Hang up right after saying "help."

My Emergency Card (fill in with Mom — keep it by the phone, not on the tablet)

My full name: _____

My parents' names: _____

My street address: _____

City, state, ZIP: _____

Mom's or Dad's phone: _____

Our family meeting spot outside: _____

Plan it: what are two ways out of our house if there is a fire?

_____

_____

DAY 5

Morning Work

Our school day has begun!

Nevaeh

Joseph · God Meant It for Good

"And we know that for those who love God all things work together for good, for those who are called according to his purpose."

Romans 8:28 (ESV) · memory verse

Verse song

Read: Genesis 45:1–15; 50:20

The famine came, and Joseph's brothers went to Egypt to buy grain. They bowed before the ruler — not knowing it was Joseph! Finally Joseph wept and said, "I am your brother, Joseph, whom you sold into Egypt." He forgave them and brought the whole family to Egypt. Years later he told them, "As for you, you meant evil against me, but God meant it for good, to bring it about that many people should be kept alive."

1. What did Joseph say in Genesis 50:20?

- "Go home and never come back."
- "I will never forgive you."
- "You meant evil against me, but God meant it for good."

2. How does Joseph's whole story show Romans 8:28 is true? Use at least two events from this week.

Greek word of the day

ἄφεσις (aphesis)

Means: forgiveness — a sending away of a debt

Ephesians 1:7 — "In him we have redemption through his blood, the forgiveness of our trespasses."

Theology fact

Joseph points us to Jesus: rejected by His brothers, He suffered, and God turned it into salvation for many. We forgive because we are forgiven.

Journal: Look back at Joseph's whole story. Write the one thing God taught you through it this week.

DAY 5

Checkpoint! 15 problems from this week. Show your work in the space or on scratch paper, and give every answer in simplest form. **Goal: 12 of 15 (80%) to pass.** If you score less than 12, that's okay — Mom will re-teach the skills you missed at the start of next week before we move on to Week 3 (Decimals & Money).

1. Simplify $\frac{24}{36}$ =

2. Write $\frac{29}{6}$ as a mixed number =

3. Write $3\frac{2}{7}$ as an improper fraction =

4. $\frac{5}{6} + \frac{3}{4}$ =

5. $\frac{7}{8} - \frac{1}{6}$ =

6. $3\frac{2}{5} + 5\frac{1}{2}$ =

7. $6\frac{1}{4} - 2\frac{2}{3}$ =

8. $\frac{4}{9} \times \frac{3}{8}$ =

9. $2\frac{1}{4} \times 1\frac{1}{3}$ =

10. $\frac{5}{6} \div \frac{2}{3}$ =

11. $3\frac{1}{2} \div \frac{7}{8}$ =

12. Which is equivalent to 4/10?

4/5 2/5 1/4

13. What is the LCD of 4 and 10?

40 20 14

14. What is the reciprocal of 3/7?

3/7 7/3 -3/7

15. A pan of brownies is 3/4 full. Nevaeh eats 1/3 of what's left. How much of the whole pan did she eat?

5/12 1/4 1/3

Score: _____ / 15 Passed (12+)? Yes / Not yet

DAY 5

English

Week 3 · Punctuation Power · Week Review

Nevaeh

Review quiz — commas, semicolons, colons, quotation marks, and apostrophes. Goal: 8 of 10.

1. Which sentence is punctuated correctly?

- We visited, St. Augustine, Florida on June 3, 2025.
- We visited St. Augustine Florida, on June 3 2025.
- We visited St. Augustine, Florida, on June 3, 2025.

2. Where does the comma go? *After church we ate lunch at Grandma's.*

- after we
- after lunch
- after church

3. Which mark belongs in the blank? *I packed two snacks ___ crackers and grapes.*

- semicolon (;)
- no mark
- colon (:)

4. Which joins the sentences correctly?

- The game was over, we headed home.
- The game was over; we headed home.
- The game was over: and we headed home.

5. Which is punctuated correctly?

- “Are you ready”? asked Mom.
- “Are you ready,” asked Mom?
- “Are you ready?” asked Mom.

6. Which word means “it is”?

- its
- it's
- its'

7. Fix it: *The dogs bowl is empty and the two cats bowls are too.*

8. Rewrite with quotation marks: *Titus shouted look at that huge rainbow*

9. Write a sentence with a semicolon and the word **therefore**.

10. Write a sentence that uses a colon before a list of three things you'd pack for a trip.

DAY 5

Science

Week 3 · Matter & Its Changes · Week Review

Nevaeh

Review quiz — matter and its changes. Goal: 8 of 10.

1. In which state do particles only vibrate in place?

solid | liquid | gas

2. A gas takes the shape and volume of its container because its particles…

do not move | are far apart and move freely | are packed tightly

3. Water vapor turning into dew on the grass is…

condensation | evaporation | sublimation

4. Which is a chemical change?

Freezing juice into popsicles | Frying an egg | Cutting paper into snowflakes

5. Which is a chemical property?

color | flammability | density

6. In A + B → C, what are A and B?

precipitates | reactants | products

7. How many oxygen atoms are in $2CO_2$?

2 | 3 | 4

8. List three signs that a chemical reaction may have happened.

9. Count the atoms: is $2Na + Cl_2 \rightarrow 2NaCl$ balanced? Show the counts.

10. Explain the law of conservation of mass and give an example.

DAY 5

History

Week 3 · The Road to Revolution · Week Review

Nevaeh

Review quiz — the road to revolution. Goal: 8 of 10.

1. Timeline: write the year next to each event, then number them in order 1–6.

Event	Year	Order	Event	Year	Order
Stamp Act			Boston Tea Party		
Lexington & Concord			Boston Massacre		
French & Indian War begins			First Continental Congress		

2. Main reason Britain began taxing the colonies:

to build a new navy for the colonies | to punish the Sons of Liberty | to pay debt from the French and Indian War

3. "No taxation without representation" protested…

Spanish taxes in Florida | taxes passed by a Parliament where colonists had no vote | all taxes of every kind

4. Who defended the British soldiers after the Boston Massacre?

John Adams | Paul Revere | Samuel Adams

5. Colonists' name for the Coercive Acts:

the Declaratory Acts | the Townshend Acts | the Intolerable Acts

6. Who rode to warn that the British were coming on April 18, 1775?

George Washington and John Adams | Paul Revere and William Dawes | Crispus Attucks and Samuel Adams

7. What country gained Florida in 1763?

France | Britain | Spain

8. What was the purpose of a boycott?

to train soldiers | to pressure Britain by refusing to buy its goods | to raise money for the king

9. Which event do you think did the most to push the colonies toward war? Defend your answer.

DAY 5

Multiplication Mastery

Week 3 · Saturday Checkpoint

Nevaeh

Checkpoint! 40 facts. Mom times you — aim to finish in 4 minutes. Goal: **32 or more right (80%)**. Circle any you miss, and practice those on Monday.

1 × 5 = _____	4 × 7 = _____	10 × 4 = _____	4 × 3 = _____
2 × 8 = _____	4 × 6 = _____	5 × 5 = _____	3 × 4 = _____
6 × 2 = _____	4 × 2 = _____	4 × 3 = _____	4 × 2 = _____
4 × 1 = _____	1 × 4 = _____	3 × 2 = _____	2 × 2 = _____
1 × 4 = _____	4 × 5 = _____	4 × 7 = _____	1 × 7 = _____
4 × 2 = _____	10 × 5 = _____	4 × 4 = _____	1 × 9 = _____
3 × 6 = _____	4 × 5 = _____	1 × 5 = _____	10 × 3 = _____
6 × 3 = _____	8 × 10 = _____	5 × 5 = _____	4 × 2 = _____
3 × 3 = _____	6 × 10 = _____	4 × 5 = _____	3 × 3 = _____
10 × 10 = _____	5 × 9 = _____	6 × 10 = _____	3 × 2 = _____

Score: _____ / 40 Time: _____

Facts I need to practice:

DAY 5

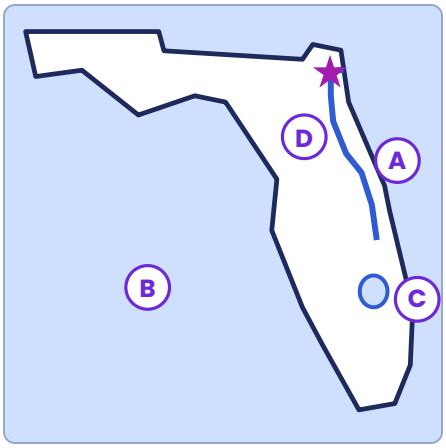

Geography

Week 3 · Florida's Land & Water + Review

Nevaeh

Florida's land & water: Florida is a low, flat peninsula — its highest point, Britton Hill, is only 345 feet high, the lowest high point of any state. The **St. Johns River** (about 310 miles) is Florida's longest river and flows **north**, emptying into the Atlantic near Jacksonville. **Lake Okeechobee** is Florida's largest lake.

Watch first

Match each letter on the map.

1. St. Johns River — A B C D

2. Lake Okeechobee — A B C D

3. Atlantic Ocean — A B C D

4. the Gulf — A B C D

Week review — 8 of 10 to pass (the 4 map letters count too).

5. High land with a flat top and steep sides:

valley | plain | plateau

6. Land with water on three sides:

isthmus | island | peninsula

7. Where a river begins:

its source | its bay | its mouth

8. Which way does the St. Johns River flow?

west | north | south

9. Name the tallest mountain on Earth and the continent it's on.

10. Explain the difference between a bay and a peninsula.

DAY 5

Fun Electives

PE Day · Backyard Relay Races

Nevaeh

Make two teams (big kids pair up with littles). Each race: one runner at a time goes to the cone and back, then tags the next teammate. Time each team. Water break between races! Good sportsmanship counts: "let us run with endurance the race that is set before us" (Hebrews 12:1).

Relay ideas

Race	How	Team 1 time	Team 2 time
Running relay	run to the cone and back, tag the next runner		
Spoon relay	carry a potato or ball on a spoon — drop it, start over		
Sack hop	hop inside a pillowcase		
Crab-walk relay	tummy up, hands and feet		
Wheelbarrow	partner holds your ankles; walk on your hands		
Backwards walk	walk backwards — no peeking!		
Ball-between-knees	squeeze a ball between your knees and waddle		

1. What makes a relay team fast?

- skipping the hard races
- one fast runner doing everything
- quick, clean tags and everyone doing their part

Which race was hardest for your team, and what would you change next time? How did you show good sportsmanship?
